If you are looking for character strengths cards, then these are the ones! They are a colorful tool for integrating into coaching and therapy sessions and homework. The cards are insightful, user-friendly, and ready-for-impact – a tangible resource to help clients build character strengths fluency, catalyze exploration, and set clients on a trajectory of strengths application for building well-being, enhancing relationships, and managing stress.

“...If you are looking for character strengths cards, then these are the ones! They are a colorful tool for integrating into coaching and therapy sessions and homework. The cards are insightful, user-friendly, and ready-for-impact – a tangible resource to help clients build character strengths fluency, catalyze exploration, and set clients on a trajectory of strengths application for building well-being, enhancing relationships, and managing stress.”

Teach clients the language of character strengths

The VIA character strengths look at what positive character traits help us lead fulfilling and happy lives, rather than looking at what is wrong with us. Research has shown that knowing your strengths and using them more often leads to greater well-being, better performance, and more resilience. With these cards, you can help clients learn more about their character strengths.

This full-color 50 card set provides cards for each of the 24 VIA character strengths and 6 virtues as well as information cards to hand out in groups and individual sessions. On top of that, 16 ready-to-use, evidence-based intervention cards help clients discover and explore their strengths and practice applying them more often. The cards are a valuable addition to the toolboxes of coaches, trainers, and therapists from any background.

Matthijs Steeneveld / Anouk van den Berg

Character Strengths Intervention Cards

Contents of the Booklet

- Foreword by Ryan M. Niemiec
- Introduction
  - People Using the Cards on Their Own
  - Practitioners Using the Cards
  - Types of Cards
- Using the Character Strengths Cards
  - The VIA Character Strengths
  - Completing the VIA Survey
  - Signature Strengths
  - Working With Clients on Character Strengths
  - Ideas for Using the Character Strength Cards
- Using and Adapting the Intervention Cards
  - Selecting the Right Intervention
  - Tailoring the Interventions

Types of Cards

- 4 information cards with a dark blue border.
- 6 virtue cards: Each has its own color with the associated character strengths on the back.
- 24 character strength cards: The front has the color of the associated virtue and the 24 character strength icons on the back. The optimal use and an example of overuse and underuse of the character strength are listed on each card.
- 16 intervention cards are identified by the dumbbell icon and a gray border, and the goal of the intervention is also listed (see target icon).

About the authors

Matthijs Steeneveld, MSc, is a positive organizational psychologist. He trains and consults organizations on strengths use, positive organizational change, and psychological capital. He is co-founder of the Dutch Bureau for Positive Psychology, where he trains professionals to work with positive psychology. He is the author of several books on psychological capital, self-compassion, and appreciative inquiry.

Anouk van den Berg, MSc, is a psychologist in institutional mental health care, working with diverse client groups and approaches. She helps people find their strengths to be able to deal with psychological challenges. She works with cognitive behavioral therapy, mindfulness, EMDR, and strengths, performing both therapy and psychodiagnostic research.

Diego de Leo / Vita Poštuvan (Editors)

Reducing the Toll of Suicide
Resources for Communities, Groups, and Individuals

2020. x + 222 pp.
ISBN 978-0-88937-569-7

Leading experts on the latest research and practice in suicide prevention

The carefully selected chapters in this volume provide food for thought to practitioners, researchers, students, and all those who come into contact with the tragedy of suicide, with the hope of stimulating new ideas and interventions in the difficult fight against suicidal behaviours.

This is the second book based on the Intuition, Imagination and Innovation – TRIPLE i in Suicidology international conferences, which are organised annually by the Slovene Center for Suicide Research in memory of the late Prof. Andrej Marušič with the aim of promoting intuition, imagination, and innovation in the research and prevention of suicide and suicidal behaviour.

In five parts, the internationally renowned team of authors summarises the research looking at:

- Understanding individuals (assessing risk in older adults and psychotherapy with suicidal patients),
- Understanding the groups at risk of suicide (including youth, people in prison, men, and people with mood disorders),
- Understanding the role of community (including the Papageno effect, technology-based and collaborative approaches to prevention, as well as bereavement),
- Models of understanding suicide (including the integrated motivational-volitional model of suicidal behaviour and the hot air balloon model of risk factors for suicide), and
- Understanding the unique ethical and methodological issues associated with research in this field.

Reducing the Toll of Suicide

Table of Contents

Foreword
Preface
Acknowledgments

Part I: Understanding the Individual
Chapter 1: Assessing Suicide Risk in Older Adults
Diego De Leo
Chapter 2: Psychotherapy With Suicidal Patients
Øivind Ekeberg

Part II: Understanding the Groups at Risk
Chapter 3: Long-Term Perspectives on Suicide Risk of Youth: Lessons and Illustrations From Longitudinal Studies
David C. R. Kerr
Chapter 4: The Continuing Problem of Suicide in Prisons: Key Issues For Prevention And Further Research
Lisa Marzono & Giulio Castelpietra
Chapter 5: Understanding Male Suicide: A Qualitative Perspective
Nuša Zadračev Sedov, Diego De Leo, Gregor Žvelc
Chapter 6: Predicting Suicidal Behaviour in Patients With Mood Disorders: The Role of Underlying Bipolarity
Zoltan Rihmer, Annamária Rihmer

Part III: Understanding the Community Role
Chapter 7: Papageno Effect: Its Progress in Media Research
Thomas Niederkrotenthaler
Chapter 8: Ethical Guidelines for Technology-Based Suicide Prevention Programmes
Eva de Jaegere, Marjolijn van den Berg, Solvejg Wallyn, & Gwendolyn Portzky
Chapter 9: Community Intervention: Collaborative Approaches to Suicide Prevention
Vanda Scott
Chapter 10: Community Responses and Reactions to Bereaved: Suicide Survivors’ Perceptions
Vita Poštuvan

Part IV: Models of Understanding
Chapter 11: Status of the Integrated Motivational–Volitional Model of Suicidal Behaviour
Karen Wetherell, Seonaid Cleare, Tiago Zortea, Rory O’Connor

Part V: Understanding Suicidology
Celine Larkin

About the editors

Diego De Leo, MD, PhD, Doctor of Science and Emeritus Professor of Psychiatry, Griffith University, Australia, is the Head of the Slovene Centre for Suicide Research (UP IAM), a world-leading researcher in suicide research and prevention over several decades, and he has designed and advised suicide prevention activities, projects, and programs around the world, including his contribution to the World Health Organization.

Vita Poštuvan, PhD, EuroPsy, Associate Professor of Psychology, is the Deputy Head of the Slovene Centre for Suicide Research (UP IAM). She is involved in research, public-health work, and interventions related to suicidal behavior, bereavement, and mental health. She also works in crisis situations and provides therapy for people in distress. She is an active member of several international and national associations in the fields of suicidology and psychology and has worked professionally in Austria, Japan, China, and India.

Psychoanalysis and Projective Methods in Personality Assessment
The French School

ISBN 978-0-88937-557-4

Unique synthesis from the French School of psychoanalytical projective methods

This unique book synthesizes the work of leading thinkers of the French School of psychoanalytical projective methods in personality assessment, exploring its theories and methods and its clinical applications. Detailed case studies from different stages of life examine the psychopathology of everyday life with its severe and disabling states of suffering. Contemporary advances in research and clinical work are presented, and the groundbreaking early work of Nina Rausch de Traubenberg, Vica Shentoub, and Rosine Debray are also critically reread and discussed.

“Clinical tools adapted for clinicians and researchers in the appendices include a useful schema to facilitate the interpretation of the Rorschach and TAT together, a list of latent solicitations for the TAT, and the current version of the TAT Scoring Grid. This book is essential reading for clinical psychologists, psychiatrists, psychotherapists, researchers, and students interested in applying psychoanalytical theory to projective methods.”

“‘This compendium is a remarkable synthesis by leading figures of the French School of psychoanalytic projective methods in personality assessment. This skillfully edited and magnificently translated book provides the English-speaking world with access to the rich and vibrant tradition of the French School. I literally could not put this book down!’”

Howard D. Lerner, PhD, Assistant Clinical Professor of Psychology, Department of Psychiatry, University of Michigan Faculty, Michigan Psychoanalytic Institute, Ann Arbor, MI, USA

Table of Contents
Preface
Benoît Verdon and Catherine Azoulay

Theory & Methods
1 Projective Methods in Clinical Psychology: Developments, Confirmations, and Contradictions: A Tribute to Nina Rausch de Traubenberg and Rosine Debray
Catherine Chabert

2 Dynamics of the TAT Process: Psychoanalytical and Psychopathological Perspectives
Benoît Verdon, Catherine Chabert, Catherine Azoulay, Michèle Emmanuelli, Françoise Neau, Sarah Vibert, and Estelle Louët

3 From Self-Representation to Narcissism ... and Back Again?
Françoise Neau

4 The Utility of the Self-Representation Grid in Differential Diagnosis
Claude de Tychey

5 Nina Rausch de Traubenberg: In a Line of Transmission ... The Question of Norms in the Rorschach Test
Catherine Azoulay

Clinical Applications & Case Studies
6 How to Deal With Excessive Reality? Regarding Bodily Sources of Subjectification
Monika Boekholt

7 From Clinical Work on Learning, to Learning Clinical Work With Rosine Debray
Catherine Weismann-Arcache

8 Prepsychoses in the Work of Nina Rausch de Traubenberg: Contributions and Developments in Projective Psychology
Jean-Yves Chagnon

9 Thought Processes in Adolescence: A Projective Perspective
Michèle Emmanuelli

10 Traumatic Traces and Projective Figures of Catastrophes of Symbolization
Pascal Roman

11 From Bipolar Disorder to Melancholia and Mania: The Contribution of Projective Tests in the Study of Manic Depressive Disorder in a 16-Year-Old Girl
Estelle Louët

12 Psychosomatic Economy: A Notion Cherished by Rosine Debray
Marie-Christine Pheulpin

13 Mentalization and Projective Methods: Training and Research in Psychoanalysis-Oriented Clinical Psychology, Using the TAT Scoring Grid Developed by Rosine Debray
Marie-Frédérique Bacqué

14 Changing While Remaining the Same: Self-Representation Confronted With Aging
Benoît Verdon

Appendices
Appendix 1: Evaluation of Psychic Functioning: Using a Schema of Interpretation of Projective Data
Appendix 2: Latent Solicitations of TAT Picture Cards
Appendix 3: TAT Scoring Grid

About the editors

Benoît Verdon, PhD, is clinical psychologist, psychoanalyst, full professor of clinical psychology and psychopathology at the Université de Paris, assistant director of the research laboratory Psychologie Clinique, Psychopathologie, Psychanalyse (PCPP). Past president of the Société du Rorschach and des méthodes projectives de langue française. Member-at-large of the Board of the International Society of the Rorschach and Projective Methods.

Catherine Azoulay, PhD, is clinical psychologist, psychoanalyst, full professor of clinical psychology and psychopathology at the Université de Paris, and member of the research laboratory Psychologie Clinique, Psychopathologie, Psychanalyse (PCPP). Past copresident of the International Network of Research Projective Methods and Psychoanalysis. She is director of the university diploma program in projective psychology.

Rainer Sachse

Personality Disorders
A Clarification-Oriented Psychotherapy Treatment Model

ISBN 978-0-88937-552-9

Practical advice for treating personality disorders

This praxis-oriented guide presents a treatment model of personality disorders (PDs) based on the latest research that shows that some “pure” PDs are due to relationship disturbances. The reader gains concise and clear information about the dual-action regulation model, the framework for clarification-oriented psychotherapy, which relates the relationship dysfunction to central relationship motives and relationship games. Practical information is given on how to behave with clients and clear therapeutic strategies based on a five-phase model are outlined to help therapists manage interactional problems in therapy and to assist clients in achieving effective change.

Out July 2019

Elsa Ronningstam, PhD, Harvard Medical School, Harvard University, Cambridge, MA

Personality Disorders
A Clarification-Oriented Psychotherapy Treatment Model

Table of Contents

Foreword

1 Essential Basic Concepts of Personality Disorders
1.1 Introduction
1.2 The Term Personality Disorder
1.3 Style and Disorder
1.4 Making Diagnoses
1.5 Resources
1.6 Personality Disorders as Relationship Disorders
1.7 Therapist Expertise
1.8 Relevance of DSM and ICD

2 Characteristics of Personality Disorders
2.1 Introduction
2.2 Ego-Syntony and Ego-Dystony
2.3 Motivation for Change
2.4 Clients Are Motivated to Seek a Particular Relationship
2.5 Interaction Maneuvers
2.6 Tests
2.7 Problems Encountered by Therapists

3 What Is Clarification-Oriented Psychotherapy?
3.1 Introduction
3.2 Aspects of Clarification-Oriented Psychotherapy
3.3 Empirical Findings

4 General Psychological Function Model for Personality Disorders
4.1 Introduction
4.2 Dual Action Regulation Model

5 Diagnostic Features of Personality Disorders
5.1 Introduction
5.2 Relationship Motives

6 Therapeutic Strategies for Clients With PD: Consequences of the Model
6.1 Introduction
6.2 Therapy Phases
6.3 Therapeutic Strategies for Phase 1: Model and Relationship
6.4 Therapeutic Strategies in Phase 2: Game Level and Tests
6.5 Therapeutic Strategies in Phase 3: Clarification of Schemas
6.6 Therapeutic Strategies in Phase 4: Working Through Schemas
6.7 Therapeutic Strategies in Phase 5: Transfer

7 Types of Personality Disorders
7.1 Introduction
7.2 Pure and Hybrid Personality Disorders
7.3 Proximity and Distance Disorders
7.4 Differences Between Proximity and Distance Disorders
7.5 Further Specific Therapy Approaches
7.6 Overview of Disorders

8 Narcissistic Personality Disorder
8.1 Description and Types of NPD
8.2 Definition of NPD, Based on Dual Action Regulation Model
8.3 Therapeutic Strategies

9 Histrionic Personality Disorder
9.1 Description and Types of HPD
9.2 Definition of HPD, Based on Dual Action Regulation Model
9.3 Therapeutic Strategies for HPD in General

10 Dependent Personality Disorder
10.1 Description of DPD
10.2 Definition of DPD, Based on Dual Action Regulation Model
10.3 Therapeutic Strategies

11 Avoidant Personality Disorder
11.1 Description of AvPD
11.2 Definition of AvPD, Based on Dual Action Regulation Model
11.3 Therapeutic Strategies

12 Passive-Aggressive Personality Disorder
12.1 Description of PAPD
12.2 Definition of PAPD, Based on Dual Action Regulation Model
12.3 Therapeutic Strategies

13 Schizoid Personality Disorder
13.1 Description of SzPD
13.2 Definition of SzPD, Based on Dual Action Regulation Model
13.3 Therapeutic Strategies

14 Obsessive-Compulsive Personality Disorder
14.1 Description of OCPD
14.2 Definition of OCPD, Based on Dual Action Regulation Model
14.3 Therapeutic Strategies

15 Paranoid Personality Disorder
15.1 Description of PPD
15.2 Definition of PPD, Based on Dual Action Regulation Model
15.3 Therapeutic Strategies

About the author

Rainer Sachse, PhD, is Head of the Institute for Psychological Psychotherapy (IPP) in Bochum, Germany. He studied psychology from 1969 to 1978 at the Ruhr University of Bochum, Germany, and went on to gain his doctorate in psychology and a postdoctoral qualification for a full professorship, and later becoming a professor of clinical psychology and psychotherapy. At the end of the 1990s, Prof. Sachse developed a dual action theory of personality disorder which led to the creation of clarification-oriented psychotherapy, a therapy approach which he continues to use and develop today. His main areas of interest are personality disorders, psychodynamics, clarification-oriented psychotherapy, and behavioral therapy, and he has written extensively about these themes.
Sustainable Human Development
Challenges and Solutions for Implementing the United Nations’ Goals

In September 2015, 193 member states of the United Nations adopted the action plan Transforming Our World: The 2030 Agenda for Sustainable Development, which outlines 17 Sustainable Development Goals (SDGs). The Agenda recognizes the need to look beyond narrow economic measures of progress and consider all aspects of well-being for current and future generations, to eradicate poverty worldwide, and to safeguard the planet.

This collection of research from around the world shows that the SDGs need to be addressed in a holistic manner and that psychologists play an important role in their effective implementation, having expertise in addressing questions of how to make national policies work for diverse individuals, how to work with vulnerable persons, and how to track individuals’ development over time in the face of societal changes. In particular, the importance of investment in positive child and youth development, the role of life span theories, and the use of longitudinal data are discussed in this volume. Three commentaries explore different aspects of the research presented and help us further understand the complexities of meeting the Agenda.

Table of Contents
The HEXACO (Honesty-Humility, Emotionality, eXtraversion, Agreeableness, Conscientiousness, Openness) six-factor model of personality structure has been in use for over twenty years and offers a convincing alternative to the five-factor model.

This collection of contributions from around the world demonstrates that research into the model is very much alive. Beginning with a historical overview of the early lexical studies of personality structure exploring how past adjective selection has impacted on personality theory, the volume also presents applications of the model and new approaches to measurement, including an extended twin family study examining genetic and environmental variance and a look at the use of behavior cues in a gamified online environment. The volume also presents what is probably the most comprehensive meta-analysis of the psychometric properties of the HEXACO domain scales.

This is essential reading for all researchers and clinicians interested in personality structure.
